

STATE COLLEGE FAMILY YMCA

State College, PA

M. John Lew Architects (formerly Comprehensive Design A/E) has worked closely with the YMCA Board of Directors and their building committees since 1998 to help them realize two major facility additions.

Phase I: The first expansion was a gymnasium and fitness center. The 13,500 SF addition doubled the size and program capacities for the original building.

Phase II: In 2001, a major programming and design project was undertaken. The 25,000 SF addition was to build an eight-lane competition swimming pool and separate therapeutic pool. Along with this design, existing locker rooms were removed, existing entry and circulation was reworked, and new larger toilet rooms and locker facilities were designed. A new larger daycare facility was also a part of this major undertaking.
