

TOMLINSON CENTER ADDITION/RENOVATION

Lock Haven University of PA

Lock Haven, PA

Building design for an 8,700 SF addition to the existing 4,000 SF athletic locker building at the existing football stadium. Design included a new locker room, training room, toilets, showers, and weight room for the football team. Other areas were reconfigured to accommodate ladies field hockey and men's and women's track team. The new facility required a significant effort to relocate and design a main facility entry that would address the stadium seating population as well as attracting the event visitors to enter and observe the athletic trophy display within the entry lobby.
