

WINDMERE MEDICAL CENTRE

State College, PA

M. John Lew Architects, LLC was commissioned to design a signature medical/office complex that will be visible from the South Atherton Corridor, yet address the "Windmere Office Park."

The building is a three-story, 42,000 SF, steel structure with lightweight metal framing, brick veneer and aluminum panel curtain wall enclosure. The building mass was divided into two masonry and glass sections with sloped metal roofs. The center masses lighten and separate the masonry components with the use of aluminum panels and glass. These areas are where the two separate building entrances are located.
