

RE/MAX CENTRE REALTY State College, PA

The RE/MAX is a two story, 16,000 SF, steel cage superstructure. The exterior is a split-face and brick masonry facade with a flat roof. It is also fully sprinkled and has an elevator. M. John Lew Architects also considers this a signature building due to not only the articulation and shape of the entry and stair tower roofs, but the use of exterior materials not usually seen in the State College area.
