

# SHANER HOTEL GROUP CORPORATE HEADQUARTERS

State College, PA

This office complex was realized through Design/Build partnership between the Owner, Contractor, and Architect. The facility is a five story, 39,000 SF office complex housing all the different operational departments that make up the Shaner Hotel Group Corporations. M. John Lew Architects, LLC worked with the client and contractor very closely to not only refine the design, but to make the final design as economical as possible considering the required program. The structure and building envelope is a structural steel cage with metal studs and brick veneer curtain wall enclosure. The overall aesthetics will be in keeping with the desired architecture already established in the Williamsburg Square complex of buildings.
